I am an Austin based Software Engineer who loves tearing apart code and solving problems. I have an eye for design and incorporate that into everything I build. I particularly enjoy full stack development and building API's.

Relevant Experience

General Assembly, Austin Tx

Software Engineering Immersive Fellow

(07/2019) - (10/2019)

- Three-month, 500 hour full-time and full-stack software engineering program conducted in a multi-campus connected setting. I gained experience with the latest front-end and back-end programming languages, tools and methodologies, including: JavaScript, ReactJS, Nodejs, Express, Python, Django, MongoDB, Amazon Web Services S3, git, GitHub, PostgreSQL, Agile/Scrum

Education

Full Sail University, Winter Park FL

Web Design and Development, Bachelor of Science

- Was provided with the focused knowledge and understanding needed to deploy modern web applications. Used industry standard tools, including modern client-side and server-side languages, relational and non-relational database structures, and frameworks used in modern web stacks.

Additional Work Experience

Megg's Cafe, Temple Tx

Front of House Manager

(05/2010) - (06/2016)

- Coordinated daily restaurant operations; regularly reviewed product quality and researched new vendors; controlled operational costs and identified measures to cut waste; implemented policies and protocols to maintain future restaurant operations
